In recent years, MUP has undergone a number of changes, as it has sought to adapt to the changing landscape of academic publishing. These changes have included a shift towards digital publishing, a greater focus on open access, and a new emphasis on interdisciplinary research.

One of the most significant changes at MUP has been the move towards digital publishing. In 2015, MUP launched its first digital-only journal, the *Journal of Cultural Research*. Since then, MUP has continued to invest in digital publishing, and now offers a wide range of its books and journals in both print and electronic formats.

The move towards digital publishing has been driven by a number of factors, including the increasing popularity of e-books and the rising costs of print production. However, MUP also believes that digital publishing offers a number of advantages over print. For example, digital books and journals can be accessed by a wider audience, and they can be updated more easily to reflect new research findings.

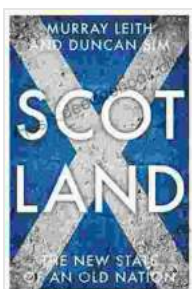

Another significant change at MUP has been the greater focus on open access. Open access refers to the practice of making research freely available online. MUP believes that open access is essential for the

dissemination of knowledge and the advancement of research. As a result, MUP has made a number of its books and journals available open access, and it is committed to expanding its open access offerings in the future.

The new emphasis on interdisciplinary research is also reflected in MUP's publishing program. In recent years, MUP has published a number of books and journals that explore the intersection of different disciplines. For example, MUP has published books on the history of science, the sociology of literature, and the politics of culture.

The changes at MUP are a reflection of the changing landscape of academic publishing. The move towards digital publishing, the greater focus on open access, and the new emphasis on interdisciplinary research are all part of MUP's commitment to providing high-quality scholarship to the global academic community.
